DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 14-19, 21 and 24-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 0 943 890.

3. EP 0 943 890 clearly discloses the invention as claimed as described in paragraphs 0013-0023 and paragraphs 0034-0051 of the EP 0 943 890 reference, for example.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 20, 22 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0 943 890 in view of WO 00 70304.

6. EP 0 943 890 discloses the invention substantially as claimed. However, EP 0 943 890 does not disclose that the lights light up synchronously with the image taking device as claimed. WO 00 70304 discloses that it is known to pulse lights in the manner claimed for the purpose of correlating signals with the emitter that produces the signal (see page 6, line 17 through page 7,

Art Unit: 2859

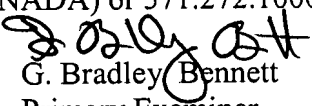

line 15, for example). Therefore, it would have been obvious at the time the invention was made for one of ordinary skill in the art to synchronize the lights of EP 0 943 890 in the manner taught by WO 00 70304 for the purpose of correlating signals with the emitter that produces the signal.

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
